GUITEAU'S TRIAL

Washington, November 21.-Guiteau had a sufficient escort this morning, no less than eight mounted police being detailed to guard him on the way to the court. He arrived at the court house as early as 7 o'clock but at that hour the crowd, numbering 300 people, had assembled. When he decended from the van he showed evident nervousness. As he was proceeding up the long opening, lined on ecah side with people, his teeth chat-tered with tear. He sped along at an increased pace, desirous to get out of the crowd as quickly as possible. Arriving within the walls of the building, he gave a sigh of relief and was hurried up the stairs to await the was a larger crowd than usual outside and the seats were all taken within. The prisoner was ushered into court at 10:12 a. m. He looked paler than usual and like one who had not slept well. When he shook hands with Mrs. Scaville, she asked him how he felt. "I feel well," said he. He then took up some paper he had brought with him and began to read when the roll of jurors had been called, Mr. Robinson rose, addressing the court, and said that an article in yesterday's Washington Post made it necessary for him to make a statement in court. He then renewed his as-

signment by the court to assist in the defense, his asking for two weeks, time for preparation and his understanding that the time was not granted because Mr. Scoville himself objected to t. This action of Mr. Scoville had him to think it best to get an assistant counsel, who would not try to undo privately what he had sought to have done publicly. This he sought to do, but in vain. But notwithstanding this, he tried to put up with Mr. Scoville's insults until last evening. Then he saw the article referred to, which said that Mr. Scoville had said: "He (Robinson), had been making up the malpractice plea against his wish, and that one or the other would have leave case to-day, unless this pleawas abandoned at once." Mr. Robinson said Mr. Scoville had talked to him on the subject and had been informed weeks ago that he (Robinson) to waive no defense possible, but to have all facts brought out and then adapt or abandon as the facts, the law and the situation of the case may warrant. It was on this theory that the cross-examination of Dr. Bliss was conducted on Saturday and it was a legal examination. Mr. Scoville made no objection to his two hours' examination of this witness, but he had even promised some questions. Mr. Robinson had not been in the habit of learning the object of an associate counsel through the press. He could no longer wess ciate with such a man and asked to be relieved. Judge Cox said he appreciated the prompt sacrifice made by Mr. Robinson when he was assigned to the case. He recognized the disadvantages Robinson had labored under, and particularly since Mr. Scoville seemed to have mastered the case. He gave Mr. Robinson a very honorable discharge from the case. Mr. Robinson then

Mr. Scoville then rose and said he should begin his argument, but, after reaching a certain point, he would ask an adjournment. With this understanding he began. He rose before the jury and addressed them in a conversational tone. He said, among other things, that he thought the defense had put in much evidence that might well have been left out and the James is south, Lincoln in New York eloquent speech of the district attorney had covered much unnecessary assembly of the court, which was ney had covered much unnecessary called to older at 10:08 o'clock. Mr. Scoville stated to the jury that there was no doubt that insanity experts would be called on both sides, and no doubt different the defense would not hold their reputation much by testifying that they thought the prisoner irresponsible and msane at the time of the shooting; that the chances were that when they go home they will find some of their patients going to other hands Surely, too, such witnesses for the defense could not be influenced by the \$1.25 per day which the government allows them.
